DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I in Paper No. 8 is acknowledged. The traversal is on the ground(s) that the examiner failed to show another method of polymerization. This is not found persuasive because the claimed copolymer can be polymerized according to the method of Kowalczyk et al. 5,128,422.

The requirement is still deemed proper and is therefore made FINAL.

Information Disclosure Statement

2. The references crossed out were not considered because the examiner could not figure out the enclosed search. Applicants are requested to enclose abstracts on a separate sheet of paper, with the Japanese Patent Number clearly marked.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 3-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Kowalczyk et al. 5,128,422 or Mitsubishi Petrochem Co. LTD JP 57-195122.
5. Kowaczik et al. disclose block copolymers of polyphenylene ethers in the Abstract and aliphatic polyether diols in column 6, lines 5-17. Mitsubishi teaches a block copolymer formed from polyphenylene ether and an aliphatic dialcohol. See Abstract. Applicants' claims are not novel.

Allowable Subject Matter

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
